

**MINUTE OF JURY SELECTION**  
Call for PONTE post-doc fellowship 2022

On the 3<sup>rd</sup> of January 2023, the jury selection formed by the Doctor P. Sartori, Doctor I. Telley, and Doctor R. Henriques met in view of analysis the applications to a post-doc fellowship, in the scope of the project *PONTE program 2022*.

The jury analysed the documents included in the applications that are as annex of this minute. The call received applications from 2 candidates that were classified in the following way:

<b>Lorenzo Fant</b>	<b>CV (60%)</b>	<b>Motivation letter (25%)</b>	<b>References (15%)</b>	<b>TOTAL</b>
<b>Dr. P. Sartori</b>	<b>60</b>	<b>25</b>	<b>15</b>	<b>100</b>
<b>Dr. I. Telley</b>	<b>55</b>	<b>25</b>	<b>15</b>	<b>95</b>
<b>Dr. R Henriques</b>	<b>55</b>	<b>25</b>	<b>15</b>	<b>95</b>
Comments:				
<b>Daniela Almeida</b>	<b>CV (60%)</b>	<b>Motivation letter (25%)</b>	<b>References (15%)</b>	<b>TOTAL</b>
<b>Dr. P. Sartori</b>				Not valid
<b>Dr. I. Telley</b>				Not valid
<b>Dr. R Henriques</b>				Not valid
Comments: Did not meet requirement of "PhD in theoretical physics"				

Summary:

	<b>Complete application (Y/N)</b>	<b>CV (60%)</b>	<b>Motivation letter (25%)</b>	<b>References (15%)</b>	<b>TOTAL</b>
<b>1 – L. Fant</b>	Y	56.6	25	15	96.6
<b>2 – D.D. Almeida</b>	N				Not valid

After evaluating the applications, the jury deemed that candidate Daniela Droppa Almeida does not satisfy the academic and admission requirements. The reason is that the requirements included "PhD in theoretical physics", whereas the candidate holds a PhD in "Industrial Biotechnology", which does not comply with the requirements. Her application was therefore not taken further into consideration. The jury does remark that this lack of adequacy is further reflected in her CV, which corresponds to an applied biotechnologist, without experience in the areas specifically highlighted in this call such as stochastic processes.

The second candidate, Lorenzo Fant, does satisfy the admission requirements. Lorenzo has the set of expertise needed to carry out the goals of this project: background in stochastic simulations and theory, and experience in microbial ecology. He further

comes highly recommended from top researchers of the field. In addition, the jury also valued his targeted motivation letter for the position at hand.

Taking the above into consideration, the jury decided by unanimity recommend the hiring of the candidate Lorenzo Fant. This is based on his experience in theoretical statistical physics with applications to microbial ecology, including data analysis, which are key to the project development. The jury did not deem necessary a second evaluation step.

All the candidates were informed of the deliberations of the Jury on the 3<sup>rd</sup> of January 2023. The selected candidate accepted the position via email. If there are no complaints during the following 10 working days after the notification, it will be considered as effective the decisions of this minute.
